...SPECIFICATION will be offered on a daily basis and does not require the consumer to register **acceptance** of the **offer** with the system or make an **online reservation**. The second type of incentive is a registered incentive that requires the consumer to register an intent to dine or to make an **online reservation**. **Restaurants** can choose to offer any combination of these incentives, to be offered at anytime of the week, or no incentives at all. Once a consumer has made a **reservation** or has registered for the incentive the incentive is locked in, and the conditions of...location bar translation)

* Enter the restaurant name directly to search on a pattern match

* Cuisine

* **Promotions / incentives**

* Credit Cards **accepted**

* Price Range

* **Reservation** availability(both **online** and not **online**)

* Membership in the system Performing the search will give the consumer a list of the **restaurants** that match the criteria, a short description of the **restaurant** and an icon for each relevant content item held by the system for the **restaurant** (**accepts online reservations**, has a map, **offers** base/registered incentives, **online** menu, etc.). In addition, if the consumer is recognized by the **Web site** as a Level 1 and above consumer, and the **restaurant** is a member of the system, then a checkbox will appear allowing the **restaurant** to be added to the consumer's favorite **restaurant** list. The checkbox will also indicate if the **restaurant** is already on the list. This checkbox can be toggled to indicate that it is not to be included as a favorite **restaurant**. The results of the search will be unbiased and in alphabetical order unless the consumer chooses to perform a "biased" search, one that gives

; preferential treatment to member **restaurants** , by selecting a checkbox that will appear on the search form. Also, if the Consumer has performed a search by proximity the **restaurants** will be listed by nearest to farthest.

After the search has completed there may also...

...SPECIFICATION years, travel agents have been putting together customized vacation packages for their clients, and travel **discounters** have been marketing prepaid vacations including transportation, hotel accommodations, and restaurant arrangements collected from different suppliers. Today travel agents **offer** vacation packages over the **World Wide Web**, with **booking** and purchasing accomplished **online**. Making travel arrangements in this fashion is convenient, quick, and efficient.

However, these packages(horizontal...from system 20 versus other providers. Consumers get great values because Site59 is able to **offer** packages at a **discount** to what the consumer would pay if he or she created the package on his or her own (due to established partnerships with suppliers). Also, consumers get great suggestions and **offers**, easy navigation through intelligent categorization and truncation, one-stop solution including fulfillment, and guaranteed availability...

...true demand creation; low visibility on low-priced last minute inventory; avoid the need to **offer** "the cheapest tickets" in order to make a sale; avoid cannibalization of regular demand; and avoid brand erosion. System 20 **offers** suppliers a substantially better channel for mobilizing distressed last minute inventory versus all other emerging options such as **Internet** e-saver fares, sites that promote "cheap tickets", sites that enable planning ahead, and sites...

...such as hotel rooms in New York between October and December, or same day dinner **reservations** at a hot new **restaurant**.

System 20 prevents yield dilution/demand cannibalization because it creates new demand rather than fulfills...

 embodiment for a process for exchanging information between an
 on-board **reservation** module and a passenger of a cruise ship.
 [00471 FIG. 27 is a block diagram of exemplary
 embodiments of physical wireless **web** architectures.
 DETAILED DESCRIPTION OF PREFERRED
 AND EXEMPLARY EMBODIMENTS
 [00481 According to a particularly preferred embodiment,
 the system and method provides interactive **network** based application
 programs (subsystems) delivered to access points at a site such as a
 resort...
 ...at a resort or on a cruise ship). The system and method is intended to
 offer potential cost savings, increased profit opportunities, and the
 enhancement of the overall passenger (user or...
 ...e.g. resort or cruise ship) or alternatively by using mobile electronic
 devices with wireless **networking** technologies provided to visitors to
 the
 site or brought to the site by the user...
 ...augment existing personal and/or current in
 room/in-cabin (on-site) processes by a **network** (e.g. **internet**) based
 technology, adding new functionality while also allowing the integration
 of various existing functions into...
 ...preferred embodiment,
 the system and method may be administered by a host who maintains a
network connection with the site and related enterprises, as well as
 with users and potential users...hotel, hospital, airport, educational or
 corporate campus or other location, facility, or the like.
 [00531 **Network** : A **network** may include any type of

configurations and screen display configurations may be used.

Reservation system 1 200 utilizes a database 1 230 which stores information related to each of the particular **restaurants**. Further, a user may also utilize a search screen 1 240 which may be able to allow a user to search for particular **restaurants** or types of **restaurants** or food types and/or may be able to list the appropriate **restaurants** and allow a user to scroll up through the list using a scroll up button...

...1 244.

[01281 Referring now to FIG. 1 3, once a user of dining **reservation** system 1 200 chooses a **restaurant** in which to dine, a user may be prompted with a user interface screen 1 31 0 in which the prospective **diner** is able to choose a dinner **reservation** time 131 2. In an exemplary embodiment, the prospective **diner** may change the time by any of a variety of ways including, but not limited...

...be prompted with a user interface screen such as screen 1 330 in which a **reservation** may be confirmed.

101291 Referring now to FIGs. 14-1 6, a shore excursion information...any of a variety of associated categories may be presented, such as sites of interest, **restaurants**, shopping, night life, or other commercial enterprises. For example, referring now to FIG. 21, a **restaurant** interface screen 21 1 0 is depicted showing buttons associated with the various **restaurants** in the selected destination (Cozumel, Mexico). Once a **restaurant** is chosen, a plurality of other selections may be presented to a user, such as...

...limited to selections presented on a screen 21 20 including direction button 21 22, a **restaurant** menu button 2124 and a **reservation** button 2126. Accordingly, a user will be provided up to date information retrieved from database...

...or the Re. Further still, in an exemplary embodiment, explorer system 2000 may provide a **network** connection to an off-site navigation database, the off-site navigation database providing information relating...

...the device or would be charged an access fee for their utilization of the communications **network** itself. Further still, the user may be provided with a handheld or portable electronic device ...including, but not limited to a navigator system 2430, a daily activities system 2440, a **reservation** system 2450, a shore excursion ticketing system 2460, a port of call (inverted exclamation mark...

Detailed Description

... with Philippine food and, is not known to ever have purchased from
Editha's Filipino **Diner** before. The decision to remove the
reservations button may have been in response to evidence mined from
the general semantic **network** (GSN) maintained by Editha's Filipino
Diner that customers arriving at the site for the first time who are
known purchasers from Yummy Yummy Pizzajust happen to never make
reservations. A general semantic **network** or group semantic **network**
(GSN) is a semantic **network** for a group of customers, not as
individuals. It may be that Yummy Yummy Pizza and Editha's Filipino
Diner also have an information exchange agreement with Mally's Carribean
Cafe and it may be...
...at Mally's or perhaps who have eaten certain entrees at Lee's have made
reservations during the first visit to Editha's Filipino **Diner** 's
webpage. If so, these customers are presented with the **reservations**
button. It is also possible that Ed(inverted exclamation mark)tha's and
Yummy Yummy...
...sites who is known to live in another state, Editha's and Yummy Yummy's
webpages could be customized to have **coupons** for the local hotels in
the anticipation that the user was researching places to eat in
anticipation of a visit. Note that in place of the **reservations** button
4708, a history & language button 4802 has been added. This is in
response to...

Detailed Description

Detailed Description

... menu, and the term food also includes drinks and other consumables.

A business may provide **Internet** access for a user (preferably possessing a portable computing device) to a server system so as to assist the user to locate suitable **restaurants**. The business provides a computer server system, in communication with the **Internet**, having access to a database correlating food retail locations with associated food retail data. Food...

...The server system receives the food preference and a position of the user over the **Internet**, correlates the position of the person with one or more food retail locations (for example, by determining **restaurants** close to the user), comparing food retail data for each food retail location with the food preference, and transmitting food retail location data (such as **restaurant** addresses or GPS coordinates) to the person. Food retail locations transmitted are those supplying food with nutritional data conforming with the food preference. Directions, maps, charts, **discount** authorizations, advertisements from competing **restaurants**, and the like may further be transmitted to the user, and the user may further transmit **reservation** requests, charge authorizations, **discount** authorizations, and other data to the server system.

A PDA carried by the user can...in the form of a map.

This function can be combined with route planning. Affiliated **restaurants** can be identified on a planned route and the menus accessible over a communications I O **network**. Hence, a person may plan a route by any transportation method to a destination, and be provided with locations and possibly **reservations** at affiliated **restaurants** at a convenient time and place on the journey. This system can be combined with **discount** schemes, frequent eater schemes and the like. Marketing **discount offers**, user preferences and the like can be used to determine enhanced presentation of some **restaurants** on the display of the user's portable computing device.

Resting energy expenditure, or equivalently...

Detailed Description

Detailed Description

... years, travel agents have been putting together customized vacation packages for their clients, and travel **discounters** have been marketing prepaid vacations including transportation, hotel accommodations, and restaurant arrangements collected from different suppliers. Today travel agents **offer** vacation packages over the **World Wide Web**, with **booking** and purchasing accomplished **online**. Making travel arrangements in this fashion is convenient, quick, and efficient.

However, these packages-whether...from system 20 versus other providers. Consumers get great values because Site59 is able to **offer** packages at a **discount** to what the consumer would if he or she created the package on his or...

...to established

pay I 1 1

partnerships with suppliers). Also, consumers get great suggestions and **offers**. easy navigation through intelligent categorization and truncation, one-stop solution including fulfillment, and guaranteed availability...

...21

SUBSTITUTE SHEET (RULE 26)

on low-priced last minute invention': avoid the need to **offer** "the cheapest tickets" in order to make a sale; avoid cannibalization of regular demand, and avoid brand erosion. System 20 **offers** suppliers a substantially better channel for mobilizing distressed last minute inventory versus all other emerging options such as **Internet** e-saver fares, sites that promote

"cheap tickets", sites that enable planning ahead, and sites...

...such as

hotel rooms in New York between October and December, or same day
dinner **reservations** at a hot new **restaurant** .

System 20 prevents yield dilution/demand cannibalization because it
creates new demand rather than fulfills...

Detailed Description

Detailed Description

... given the direct access to consumers, the data processing system exceeds the capabilities of traditional **coupons** by providing issuers a greater degree of control in targeting the **offer**, restricting its use and tracking both the selection and redemption process. The data processing systems controls also make it possible for service providers, such as **restaurants** and hotels, to use an **online** electronic certificate as a ...and a way to lower overhead in providing such transactions as dining, travel and ticket **reservations**.

Summary of the Invention

The present invention provides a data processing system and method permitting...accompanying drawings in which.
FIGURE 1 depicts the flow of information in a system delivering **online coupons** to consumers;
FIGURE 2 is a flowchart of a software routine for a **coupon** issuer according to the present invention;
FIGURE 3 is a flowchart of a software routine for the **online coupon** service provider according to the present invention;
FIGURE 4 is a flowchart of a software routine for the consumer using the **coupon** service according to the present invention;
FIGURE 5 depicts the flow of information in a system providing for **restaurant reservations**;
FIGURE 6 is a flowchart of a software routine for a **restaurant** according to the present invention;
FIGURE 7 is a flowchart of a software routine for the **reservation** service provider according to the present invention;
and
FIGURE 8 is a flowchart of a software routine for the consumer using the **reservation** service according to the present invention.

Detailed Description of the First Preferred Embodiment

The present...starts 45 with a display of the main menu 46. The consumer may display the **coupons** that have already been downloaded and are resident on the consumer's PC 55. There are two methods by which the consumer could activate the **coupons** 48. The first would be to send the **coupon** file 49 to the consumer's printer. Along the way, it is barcoded with the consumer...

...the household profile data base 64. The consumer's printer 4 then prints out the **coupon** 6. Upon activation 48, a **coupon** could also be transmitted as a computer file 51, back through the **network** 52, to a data base chosen by the issuer. When **coupons** are activated 48, the consumer's resident software removes the **coupon** file that has been printed 54, updating the data base of downloaded electronic **coupons** 55 and the resident **coupon** display 47. The system also automatically removes expired **coupon** files that have yet to be activated 56. Another function of the resident software is...

...consumer in response to questions submitted by the service,
To access a new selection of **coupons**, the consumer can dial up the service data base 58, enter the PIN number 59, and view a display of all active service **coupons** 60. These **coupons** can then be selected and downloaded 61 to the consumer's PC. While **online**, the consumer's software automatically sends back to the service

* * * data base information on the consumer's selection and printing history 57, as well as information on those downloaded **coupon** files that have expired 56. It also sends back updated information on the consumer's household...

...present invention is directed to a data processing system and method for use in automating **reservations** over **online** systems for **restaurants**, hotels, or other service establishments. FIGURE 5 is an overview showing how the information and activities flow from the initial assignment of the **reservation** by the **restaurant**, to its selection by the consumer and the ultimate printing of a confirmation slip by...

ARRANGEMENT SYSTEM ABOUT TRAVEL

PUB. NO.: 2002-032792 [JP 2002032792 A]
PUBLISHED: January 31, 2002 (20020131)
INVENTOR(s): KURODA SHIGEO
APPLICANT(s): NEC CORP
APPL. NO.: 2000-214861 [JP 2000214861]
FILED: July 14, 2000 (20000714)
INTL CLASS: G07B-001/00; G06F-017/60; G07F-017/40

ABSTRACT

PROBLEM TO BE SOLVED: To provide an arrangement system about a travel which utilizes a public **network** such as the **Internet** to **offer** a train ticket, travel goods, meals for travel, a souvenir, etc.

SOLUTION: In this arrangement system about travel, the train ticket issuing terminal 2 of a railroad company, a travel company terminal 3, rental shop and outlet terminals 4, a traveler's own house terminal 5, a delivery/arrangement center terminal 6, a **restaurant** terminal 8, a lodging terminal 9, etc., are connected to the public **network** 1 such as the **Internet**. A railroad company server 7 is also connected and is provided with databases 8, such as a database for managing the issue of the train ticket, a database for managing the delivery of the travel goods, a database for managing a **reservation** for the **restaurant** of each station and a database for managing the travel schedule of each traveler. Each terminal can refer to and update the databases 8. When the traveler accesses the databases 8, personal authentication is performed.

INTL CLASS: G06F-017/60; H04N-007/173

ABSTRACT

PROBLEM TO BE SOLVED: To solve problems that a conventional request terminal such as a 'road station' is a spot-like local **promotion** to the utmost, no information is given to travelers on a **restaurant**, a souvenir shop, a small sightseeing facility, and a hotel accommodation such as a small guesthouse where the traveler can be extensively exchanged with local people, and the information is only worth of going to and coming from the sightseeing spot for the traveler.

SOLUTION: This system issues a complimentary ticket by using the request terminal for printing and issuing a desired ticket by displaying a screen for selecting the 'local advertisement' on a display screen of the request terminal, connecting the terminal to a server storing the advertisement

Information via the **Internet** or an intranet by selecting the 'local advertisement', receiving and displaying the respective advertisement information for each advertiser from the server, receiving the information on the complimentary ticket, a **discount** ticket, a **reservation** ticket, etc., and selecting the 'issue' displayed on the advertisement screen.

MAGAZINE AND **NETWORK** MERGING SYSTEM

PUB. NO.: 2001-236414 [JP 2001236414 A]
PUBLISHED: August 31, 2001 (20010831)
INVENTOR(s): KOBAYASHI NORIOKI
APPLICANT(s): BAADEI INTERNATIONAL KK
APPL. NO.: 2000-047849 [JP 200047849]
FILED: February 24, 2000 (20000224)
INTL CLASS: G06F-017/60; G06F-013/00

ABSTRACT

PROBLEM TO BE SOLVED: To actualize a magazine and **network** merging system, which has an information sending function, replacing newspaper and can efficiently transmit information of a specific area to workers who work in the area.

SOLUTION: Magazines 207 are distributed as periodicals to offices 205 and stores 206 in the specific area as a reception area at a rate of one carrier for several persons. Advertisements of respective stores carried by a magazine 207 contains URLs and timely information (**discount** sale, menu of the day at a **restaurant** , etc.), filling intervals of the distribution of the magazines 207 can be obtained from an area information sending server 211 which is connected to the **Internet** 202, by using a computer 212 or portable telephone set 214. The **reservation** of articles and services and the versatility of those articles and services in the specific area among stores are enabled.

Abstract (Basic): US 20020049535 A1

NOVELTY - A voice technology circuit converts the spoken commands from a user in vehicle (10), to electronic commands for feeding to a computer and having wireless service (16) for communicating with the Internet (20) connected to a voice net central station (22). Commercial subscribers (26,28,30) e.g. restaurant have an automated computer facility connected to the central station through Internet, for supplying hospitality reservation information automatically to the user.

USE - Used in vehicles such as car and trucks and also for aircraft and watercraft for directing travelers and motorist to restaurant hotel, motel, state park, retailer, automotive repair, medical care, shopping malls, garages, beaches, theme park, golf courses, etc.

ADVANTAGE - Provides the motorist with up-to-date lodging availability, pricing details, special offers and menu information within a reasonable driving distance. Eliminates the need to make several stops to find last minute accommodation and enables the hospitality provider to contact with increased number of travelers and thus helping in promoting business.

DESCRIPTION OF DRAWING(S) - The figure shows a schematic view of the wireless interactive mobile information system.

NOVELTY - A display selector selects projector (4) installed in park, station, etc., or a liquid crystal display (LCD) (6) in which the

public information such as questionnaire is displayed. A receiver receives response information corresponding to questionnaire in selected display. A communication unit communicates the response information received by the response information receiver to the informant.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Information response method;
- (b) Computer program for information response

USE - Information response system in product sales **promotion** and service improvement. Also for providing **reservation** conditional information of **restaurant** and hotel.

ADVANTAGE - Response information answering the public information can be easily communicated to the service terminal connected to the **network** so that troublesome work such as distribution, collection and counting of questionnaire can be avoided, thereby efficiently collecting response information answering public information.

DESCRIPTION OF DRAWING(S) - The figure shows a schematic diagram showing the **network** setup of information response system.

Abstract (Basic): JP 2002015212 A

NOVELTY - The information provided by a **restaurant** is stored on a **homepage** (40) of a server (10). A **restaurant** terminal (20) is connected to **internet** (50) through the server. A user browses the provided information of the **restaurant** through user terminal (30) and the **restaurant** obtains information regarding **reservation** and schedule information from the user terminal.

USE - For providing utilization information of **restaurant**.

ADVANTAGE - Increase in sales of the **restaurant** is obtained by providing the utilization information of several **restaurants**. Expenses are minimized, since a user can select a **restaurant** based on the information of the **discounts** and services pertaining to the **restaurant**. The pleasure of the user is enhanced, since the menu and

various service information are obtained.

DESCRIPTION OF DRAWING(S) - The figure shows a block diagram of the **restaurant** utilization information providing system. (Drawing includes non-English language text).

Patent Details:

| Patent No | Kind | Lan | Pg | Main IPC | Filing Notes |
|---------------|------|-----|----|-------------|--------------|
| KR 2001074078 | A | | 1 | G06F-017/60 | |

Abstract (Basic): KR 2001074078 A

NOVELTY - A system for ordering foods is provided to reduce the work of employees by a client directly orders foods on a screen of a table, to enable the client to make a **reservation** conveniently according to the desired place and a menu by building a server for ordering the foods, and to **offer** the client the desired cook by building specialized **restaurant** or kitchen.

DETAILED DESCRIPTION - A table terminal(1), main counter terminal(2-1), kitchen terminal(3), and hall displayer(4) are connected to the **network** . The client directly inputs the foods order via the table terminal, which immediately transfers the ordering content to the main counter terminal, kitchen terminal, and hall displayer. The main counter terminal performs a complex calculation and plays a role of linking the table terminal with the kitchen terminal and the hall displayer. The information sent from the main counter terminal to the table terminal is the statistic data showing the ordering volume per food and the cooking-expected time, while the information received from the table terminal is the ordering content and specification. The information sent from the main counter terminal to the kitchen terminal is the ordered food, while the information received from the kitchen terminal is the cooking start time. The information sent from the main counter terminal to the hall displayer is a served free meal and employees call, while the information received from the hall displayer is the state of delivering foods. The main counter terminal processes the cooking-expected time, the statistic data per item, and the payment in itself.

Abstract (Basic): JP 2001306903 A

NOVELTY - A communication unit, provided in a wine reservation
and demand information generating unit, performs communication with
another communication unit to display the input and output of
reservation , demand and dispatch information in a restaurant .

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for an
internet -based wine processing method.

USE - For e.g. restaurant , hotel.

ADVANTAGE - Offers cost-effective wine reservation processing
system.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of
an internet -based wine processing system. (Drawing includes
non-English language text).

Abstract (Basic): WO 200004677 A1

NOVELTY - The end of transmission message is sent to the recipient station from a specific station, after transmitting the ordered sequence of data frames in response to the received **reservation** confirmation message. Then, the end of transmission confirmation is received from the recipient station, for identifying the number of frames received in their original sequence.

DETAILED DESCRIPTION - Initially, a request message on communication media for **reservation** of that medium, is transmitted from the specific station to the recipient station in the **network**. A communication link controller at the specific station side responds the end of transmission confirmation received from the recipient station, when number of frames received in their original sequence are less than that of frames originally sent. The communication link controller also causes the transmission of remainder of ordered sequence of data frames to recipient station and initiation of request for **reservation** of communication medium to send the remainder. An INDEPENDENT CLAIM is also included for media access control protocol based communication apparatus for establishing communication between stations in communication **network**.

USE - For establishing communication between stations in communication **network**, using media access control (MAC) protocol.

ADVANTAGE - The sequenced data transfer mode allows the MAC to send MAC level sequenced data frames in the **reservations** and get instant feedback indicating whether the frames are successively received in sequence from the target station. The groupcast transfer mode provides MAC level reliable group address data transfer to **offer** immediate target station feedback to MAC user from each member in the group address. The address conflict resolution process provides a mechanism to perform MAC level address conflict resolution without involving the user of two MAC protocols. The MAC also provides the local address mapping using the link address and the local MAC address.

DESCRIPTION OF DRAWING(S) - The figure shows sequenced data transfer between two stations in **network**, and **reservation** process and sequenced information exchange between requester and target station.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a means for easily updating important data such as 'today' s recommended menu' and 'campaign for **limited time offer** ' having customer collection power even **when** there is no place for installing a computer or no knowledge or no time for operating the computer in the case of changing a home page of a restaurant.

SOLUTION: The contents of a data base for storing information provided from a restaurant are updated from a management picture displayed on a portable telephone. Therefore a computer installation place and specific knowledge are made unnecessary. In addition, data can be easily updated from the restaurant.

ABSTRACT

PROBLEM TO BE SOLVED: To develop a **discount** service **when** charging is processed and also to allow a user to monitor the contents of charging processing.

SOLUTION: A WWW browser 11 included in a user terminal 1 is provided with a means allowing the user to browse the WWW page of a Web shop and a means performing electronic commercial transaction with a Web shop selected by the user as the opposite party through a communication line 10, and an electronic receipt collating part 12 is provided with a means storing an electronic receipt issued and transmitted by the Web shop after the establishment of electronic commercial transaction, a discount **condition** deciding means which analyzes a part of a discount code belonging to a plurality of stored prescribed electronic receipt groups and verifies whether or not to meet a prescribed discount **condition** , and a means which transmits a discount amount related to the settlement of the commercial

'transaction to a charging settlement processing agency 3 when the
prescribe **discount condition** is met.

ABSTRACT

PROBLEM TO BE SOLVED: To satisfy the gambling passion of a player furthermore even during special prize generation and to increase thrills and excitements in the entire game.

SOLUTION: A pattern variation game is executed in a variable display device 30 based on the entry of a ball to a start winning port 20, and in the case that the display is of a big win, the special prize, that is, opening and closing a variable winning device 50 for the **maximum** of 16 times is offered. During the special prize **offer**, **when** the ball enters the start winning port 20, the additional pattern variation game of the same display contents as the pattern variation game is executed. When the additional pattern variation game is established as big winning display, it is defined that an additional **condition** is established and the variable winning device 50 is repeatedly opened and closed for the number of **times** of the **establishment** of the additional **condition** further following the end of the special prize.

ABSTRACT

*
PURPOSE: To improve service to a customer and to surely cope with a wrong discount processing when it is made by providing a discount judging means and a discount amount display control means for displaying the amount of discount on a display device in a real time when the establishment of the discount is judged by this judging means.

CONSTITUTION: When discount due to sales in the lump is established during the registration of merchandises bought by one customer, the amount of discount or discount balance changed by the establishment of discount is displayed at that time. During the display of the amount of discount or the discount balance, a buzzer 35 in an ECR rings to attract the attention of an operator and a customer. Accordingly, the operator and the customer can recognize that the discount is surely performed from the contents of the display of the display device 28 when preset discount conditions are satisfied and the discount is established. Thus, mistake in registering can be readily and properly coped with. Thus, service to the customer can be improved and wrong discount processing can be surely coped with.

JOURNAL: Section: C, Section No. 866, Vol. 15, No. 357, Pg. 149,
September 10, 1991 (19910910)

ABSTRACT

PURPOSE: To offer a PACHINKO (Japanese vertical pinball) machine rich in variety of play by providing a normal prize device, which forms any of a prize winnable establishment increasing condition and a closed condition not taking in a PACHINKO ball, or a normal start port which transfers the normal prize device, placed in the closed condition based on a prize of the PACHINKO ball, to the prize establishment increasing condition for a predetermined time.

CONSTITUTION: A normal prize device (first prize device) 2, which forms any of a prize winnable establishment increasing condition by taking in a PACHINKO (Japanese vertical pinball) ball hit out to a game board surface or a closed condition not taking in the PACHINKO ball, and normal start ports (right exercising prize port) 27, 28, which transfers the normal prize device 2, placed in the closed condition based on a prize of the PACHINKO ball, to the prize establishment increasing condition for a predetermined time, are provided. In this way, for the transfer of the normal prize device 2 in the closed condition to the prize establishment increasing condition, it is only required to satisfy a prize of the PACHINKO ball in the normal start ports 27, 28, so that possibility of generating a right advantageously to a player is increased larger than that in the case in which a plurality of conditions are satisfied.

Abstract (Basic): JP 2002189882 A

NOVELTY - The identification information of the desired goods is notified to a fixer (100) by a buyer (200). The fixer transmits the notified information to a selling person (300). The fixer pays the price of the goods to the selling person and enables to establish a sale after a **predetermined** period. The fixer cancels the sale **establishment when** a requisition is received from the buyer, within the **predetermined** period.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for accounts-settlement system.

USE - For settlement of accounts in on-line marketing.

ADVANTAGE - Payments after dissolving contract is stopped easily. Buyer has comfortability of utilizing communication marketing. Promotion and development of industry relevant to communication marketing and outstanding effect due to the same are achieved.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the accounts-settlement system. (Drawing includes non-English language text).

Abstract (Basic): JP 2002051465 A

NOVELTY - The non-consigning power systems (2-5) are connected to the consignment power system of power company (1) through the switch. The operating **conditions** are provided based on power reception **condition** from power company. The establishment of operating **conditions** is judged based on data indicating power flow power systems. The switch is opened, when operating **conditions** are established.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Power system control device;
- (b) Disk for storing software used in power system control

USE - For supplying power to consumer from power feeders through power systems.

ADVANTAGE - Enables safe and optimum installation of non-consigning power systems by setting proper operating **conditions**. Stabilizes power supply from feeder to load. Offers high economical efficiency and energy conservation efficiency.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of power supply system. (Drawing includes non-English language text).

Abstract (Basic): EP 1182599 A1

NOVELTY - A transaction information having information to identify a consumer, a business and the purchase of goods or service by the consumer, is received. When the consumer and business are determined to be member consumer and member business respectively and when the consumer has fulfilled the **requirement** of a reward program of member business, the member consumer is rewarded.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Incentive program provision method in restaurants;
(b) Consumer allowing method to receive benefits;
(c) Computer readable media having rewards providing program
USE - For providing rewards to member customer in airline industry and restaurants.

ADVANTAGE - Provides an automated consumer rewards/incentive program that requires minimal human intervention and that is substantially transparent to consumer and to the business owner. Provides a versatile tool for meeting various needs of both consumers and businesses, so as to change information in real time.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart for determining consumer awards.

Abstract (Basic): JP 2001344666 A

NOVELTY - The purchase receipt (18) passed to a foodstuff purchaser, includes price amount of foodstuffs information relating to discount of money given on foodstuffs, when supplementary goods such as half-split chopsticks (12) are not requested.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for purchase receipt issue device.

USE - In fastfood restaurants selling cooked lunch, various daily dishes, cup noodles.

ADVANTAGE - Since the discount information on foodstuffs when half-split chopsticks are not requested is given to a purchaser, consumption of appending goods is reduced, resources are protected and thus decreasing the refuse amount.

DESCRIPTION OF DRAWING(S) - The figure shows a perspective diagram of operating condition of purchase receipt issue device.

Abstract (Basic): JP 2001286412 A

NOVELTY - A heater (9) is heated by passing current through a main thermostat (2) and a sub-thermostat (3). The sub-thermostat is turned off when the heater is heated to a **predetermined** temperature and the current is conducted through a bypass diode (4). The main thermostat is operated repeatedly to control the temperature.

USE - For drying wet towels in a restaurant or amusement place.

ADVANTAGE - Offers a simple and cheap structure which prevents burning of wet towel due to excessive heat by reducing current supply to heater.

DESCRIPTION OF DRAWING(S) - The figure shows the circuit diagram of electric-heat retention chamber. (Drawing includes non-English language text).

Main thermostat (2)

Sub-thermostat (3)

Bypass diode (4)

Heater (9)

| JP 2001058053 | A | 16 | A63F-007/02 | |

Abstract (Basic): JP 2001058053 A

NOVELTY - A grand prize is offered to player, when the result of pattern variation game is judged to be great success display. When preset addition **conditions** are established during grand prize generation mode, game value is varied and advantageous grand prize is offered to the player after completion of grand prize generation, based on establishment frequency of addition **conditions**.

DETAILED DESCRIPTION - A pattern variation game is executed by a variable display device (30) arranged on the game board surface, when preset prize winning start-up **conditions** are established. A game controller (100) controls the pattern variation game and grand prize generation.

USE - For offering advantageous grand prize to player, especially in pachinko game machine, and also in slot machine.

ADVANTAGE - Since advantageous grand prize is offered to player based on establishment frequency of addition **conditions**, discourage to player is avoided and hence thrill and charm in game are enhanced reliably.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of pachinko game machine. (Drawing includes non-English text).

Abstract (Basic): JP 2000045551 A

NOVELTY - One unit (120) functioning as a geisha restaurant, has an account establishment terminal (650) and a consult terminal (660). The unit (120) is adjoined by a path to another unit (110) accommodating automatic teller machines.

USE - Used as financial institution.

ADVANTAGE - Offers easy and ready to use metal building. Enables

arrangement of power and communication line on **ceiling** . Shortens **establishment** time of financial institution. Ensures security inside building. Improves living environment inside building. DESCRIPTION OF DRAWING(S) - The figure shows the plan view of a multiple unit metal building. (110,120) Units; (650) Account establishment terminal; (660) Consult terminal.

| JP 2000042199 | A | 14 | A63F-007/02 | |

Abstract (Basic): JP 2000042199 A

NOVELTY - The drawing display in the display unit (45) is varied to establish reach mode, according to delivery of sports ball to prize winning mouth. The bonus state is offered to the player, when bonus state is established by sequential display of specific number of drawings in the display unit (47), when reach **condition** is established. DETAILED DESCRIPTION - Specific patterns are displayed in a display unit (46) of the LC screen (41), when the ball enters the start prize winning mouth.

USE - In pachinko machine.

ADVANTAGE - Improves interest of drawing game by varying drawing abundantly. Improves charm of game by inclusion of drawing display. Enables easy and exact comparison of displayed drawing for establishment of bonus state. Improves customer attraction by displaying both reach and bonus state. DESCRIPTION OF DRAWING(S) - The figure shows block diagram of game machine. (41) LC screen; (45-47) Display unit.

Dwg.1/13

|-------------|------|--------|-------------|--------------|
| JP 11196388 | A | 5 | H04N-007/08 | |

Abstract (Basic): JP 11196388 A

NOVELTY - The still-picture image signal is received upon **establishment** of synchronization operations **when** the final bit of the synchronizing data is detected. DETAILED DESCRIPTION - At the transmission side (A), **predetermined** synchronization data are encoded via a transmission side multiplier (2) using the **predetermined** symbol generated by a transmission side symbol generator (3). While distributively transmitting the encoded data ahead of a still-picture image signal, the synchronizing data are detected.

USE - For transmitting still pictures.

ADVANTAGE - Offers high noise immunity. Enables reliable synchronous operational establishment under inferior propagating **conditions** e.g. fading, thus stabilizing transmission of still-picture images. DESCRIPTION OF DRAWING(S) - The figure shows the block diagram illustrating the transmitting and receiving of SSTV signals via radio circuit. (2) Transmission side multiplier; (3) Transmission side symbol generator; (A) Transmission side.

Abstract (Basic): JP 10066764 A

The system consists of an electrically operated variable display device which displays a variety of derivation results in several variable display parts. The game machine is controlled to an advantageous situation for the player when attaining a specific display mode involving **predetermined** display results of several variable display parts. A display control device is provided to vary the derivation time for performing the derivation display of the display results in several variable display parts, including the variable display part which performs a derivation display at the end according to the situation of the variable display. A display result derivation time delay device is provided to delay the derivation display time of the display result in the variable display part where the **conditions** are not fulfilled. The derivation display is performed at the end after the **conditions** are already fulfilled and the derivation display is already performed in the other variable display parts corresponding to a specific display mode.

A **predetermined** viewable information is displayed in the variable display device with display characters having certain decided forms in the variable display parts including the one which performs the derivation display of the display result at the end among several others according to the situation of the variable display. A character operation display control device is provided for displaying the character which informs a purport of a **predetermined** operation to the variable display device when the display result of a variable display part performs a derivation display of the display result after fulfilling the **conditions** for functioning as a specific display mode. The player is informed about the **establishment** of a reach **when** the characters displayed by the variable display device perform a **predetermined** operation at the time of a so called reach being established.

ADVANTAGE - Raises feeling of anticipation to attain specific display mode effectively by slowing down end result of final derivation display **when** reach is established. **Offers** varyingly rich combination of interesting displays by operating several varieties of display characters.

| JP 9212867 | A | 12 | G11B-007/00 | |

Abstract (Basic): JP 9212867 A

The appts regenerates the data recorded by an optical disk (1) which is divided into a header part and a data recording part. The light beam output from a light beam output unit (13,14,15) irradiates the optical disk in order to regenerate the recorded data. A photodetector (24) detects the light reflected by the optical disk. A gain control unit controls the gain of the detection signal based on a gain control signal. The data recorded in the header part is divided into groups.

A lead position detector detects the lead position of the data recording part. The data detected at the lead position of the data recording part is input into the gain control unit. A reset signal output unit outputs a reset signal which turns OFF the gain control signal at a **predetermined** timing.

ADVANTAGE - Reduces delay of loop **establishment time** in AGC circuit. **Offers** stable AGC operation.

|------------|------|-----|----|----------|--------------|
| JP 9185794 | A | | 5 | | |

Abstract (Basic): JP 9185794 A

The method involves using a setter that has an input-output unit which inputs establishment constant. An establishment display information shown in a table at the setter, displays multiple establishment items for connecting with an appts. The information about establishment constant transmitted to the setter, is received to establish **predetermined** establishment item. An establishment item input-output unit inputs establishment constant applicable to each establishment item. The setter is connected to the appts, at the setting time.

The establishment item display information that displays multiple establishment items, is transmitted from the appts side to the setter. The transmitted information is included in the table of the setter. The establishment constant applicable to each displayed establishment item, is input and transmitted to the appts side. The establishment constant applicable to a **predetermined** establishment item is established.

USE/ADVANTAGE - In home, building. Offers flexible setting method that enables to correspond with various required appts.

Abstract (Basic): JP 9081485 A

The dynamic telecommunication processing control appts includes a setting input unit (41) and a setting memory (40) which receives and stores the setting processing information from the setting input unit. A situation notification unit (51) collects data on user's demand and notifies the information based on the setting processing information.

When a decision unit (50) judges the establishment of **predetermined conditions**, a setting processing unit (60) performs according to the setting processing information stored in the setting memory.

ADVANTAGE - Offers flexible communication environment. Meets user's **requirement** satisfactorily.

Abstract (Basic): JP 2001245322 A

NOVELTY - The continuous image row with respect to target object from a camera is rotated and stored in a memory in compressed state. The image data is selected to display image pair suitable for observing target object by binocular vision. The selected image data is expanded and displayed to eyes of user.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for stereo image input-output device.

USE - For input-output of stereo image in electronic commercial transaction, virtual museum, digital dictionary.

ADVANTAGE - **Offers** real object image to user without using expensive graphics function in PC and expensive machine by user. Improves reliability of target object display in electronic commercial transaction. Avoids need for processing of photographed image. Reduces fatigue of user during long time observation of target object. Facilitates arbitrary selection of image enlargement **rate** by bidirectional interaction with **user** system. Avoids need for **establishment** of synchronization between cameras. Facilitates effective usage of image data compression function by avoiding need for large number of image data. Enables efficient reproduction of optical effect produced around eyes during target object observation.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the stereo image input device.

Patent No Kind Lan Pg Main IPC Filing Notes

JP 2001273563 A 11 G07G-001/12

Abstract (Basic): JP 2001273563 A

NOVELTY - The server (1) manages details on point value earned by customer on shopping through internet. The details are downloaded in the form of web page to portable terminal (2) of customer in response to demand from terminal, through a wireless communication network connected to internet. The downloaded information is displayed in display unit of the portable terminal.

USE - For internet based shopping using portable terminals from retail stores, **restaurants**, service providing companies.

ADVANTAGE - Manages point values of sales without need for providing tickets, stamps or cards to customer, thereby reducing cost involved. Enables collective management of point value earned by lot of **customers**, thereby simplifying market **analysis** and sales **promotion** processes.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of purchasing point value control system. (Drawing includes non-English language text).

Priority Applications (No Type Date): JP 98187897 A 19980702

Patent Details:

Abstract (Basic): JP 2000020826 A

NOVELTY - The method involves distributing the customer information, **discount** amount information and bar-code symbol printed on a ticket. A bar-code reader (2) scans the bar-code symbol on the ticket brought by the customer. The restoration of the customer information and the **discount** amount information based on the read bar-code symbol, after which the total customer information are collected for every ticket.

USE - For POS system in e.g. fast food chain **restaurant**, convenience store.

ADVANTAGE - Enables simple, inexpensive collection of customer information in small store. Provides real-time, efficient operation and management strategy by emphasizing **discount** amount information and performing fine **analysis** of **customer**. DESCRIPTION OF DRAWING(S) - The figure shows the component diagram of a POS apparatus performing a customer information collection procedure. (2) Bar-code reader.

| Patent No | Kind | Lan Pg | Main IPC | Filing Notes |
|------------|------|--------|--------------|--------------|
| US 5805203 | A | 23 | H04N-007/173 | |

Abstract (Basic): US 5805203 A

The **establishment** involves creating a series of transmission frames divided into a sequence of transmission frame periods. A connection request signal is transmitted during one of the transmission frame periods. A connection request message is received from the user in response to the connection request signal. Two frame transmission periods are allocated to the user for connection information and data respectively.

The period information unique to the user and the position of the first frame transmission period within the sequence is transmitted during a predetermined frame transmission period. The position of the second frame transmission period within the sequence is transmitted

during the first frame transmission period. The data are transmitted during the second frame transmission period.

ADVANTAGE - Transmits high speed data, telephony, video information to broadcast and CATV users. Allows transmission rates to be adjusted on as per receiver basis in both forward and return directions. Allows use of standard TV components in customer equipments. Avoids noise in upstream and downstream paths. Offers high quality signal at maximum rate.

Abstract (Basic): JP 10004444 A

The equipment has a base (3) which is attached to the wall surface. An aperture (3a) in the base, is plugged by a cover surface (4b). A cover (4) is attached at the portion where the inside of the base is exposed externally. A vertically movable intermediate part is set near the rotating axial line (Rz) of the cover. A convex shaped part (10) is provided on the cover surface (4b). The convex shaped part is arranged orthogonal. Corresponding to the convex shaped part, the matching member (20) is provided in the base. The convex shaped part has a first edge (12) which stands on the cover surface. A second edge (13) is set far apart from the cover surface. A curved edge (14) is positioned between the first and second edge.

The distance from the rotating axial line position of the cover to the second edge, is set as d1. The distance to the circular edge is set as d2 which is larger than d1. The matching member has a first support part (22d) that supports convex shaped part from the bottom. The matching member has a matching board (21) with a surface (21a) on which the first support part is positioned. A second support part (23) with a surface (23a) is positioned along the wall surface.

ADVANTAGE - Prevents dropping of cover. Enables reliable holding such that cover is opened more than right angle. Offers light structure.

| Patent No | Kind | Lan | Pg | Main IPC | Filing Notes |
|------------|------|-----|----|-------------|--------------|
| JP 7175855 | A | | 18 | G06F-017/60 | |

Abstract (Basic): JP 7175855 A

The order servicing system comprises a first memory device (4) which stores the **matching customer** code, **customer** name and delivery place data. The customer code, goods code and quality are input by a sales clerk using a keyboard (1) and a barcode scanner (2), when food items are ordered. A processing device (8) **matches** the **customer** 's specific information, goods specific information and quantity of order and stores in an order management information memory (5).

An automatic indication is received by the user after placing the order for goods. A printer (7) prints the **voucher** which contains the customer name, order number, delivery place, goods specific information, quantity by referring to information stored in the memory.

ADVANTAGE - Performs order service for eatables smoothly. Prevents chances in forgetting to collect bill amount.

DAILY BRIEFING

Atlanta Constitution (AC) - Friday, March 3, 2000

By: From our news services

Edition: Metro Section: Business Page: F2

Document Type: Brief

Word Count: 2,521

TEXT:

... WSB radio and will be broadcast to more than 175 affiliate stations in the Braves' **network**. The spots will feature Jameson Chief Executive Tom Kitchin talking about the company and its...

...Perfect Stay Every Time."

DoubleClick chief vows to maintain privacy

New York --- DoubleClick Inc., an **online** advertising firm, said it made a mistake in planning to link **Internet** users' names and their activity on **Web sites** and won't do so until privacy standards are set. Chairman and Chief Executive Kevin O'Connor said DoubleClick has never implemented its plan to link **Internet** user names and data about what **Web sites** they visit. "We commit today, that until there is agreement between government and industry on privacy standards, we will not link personally identifiable information to anonymous user activity across **Web sites**."

Deals

Lockheed-Comsat deal near congressional OK

> Washington --- House and Senate negotiators reached a final...

... have the power of a heavy-duty computer. Broadcom said Stellar's technology requires less **capacity** and memory to deliver video across electronic **networks**.

Tera Computer buying ailing Cray Research

Seattle --- Cray Research, an ailing business once famous for...

... traditional media companies. The three plan to integrate Hicks Muse's media holdings with the **Internet** investments of CMGI and Hong Kong-based CyberWorks. The integration could take the form of...

... financial condition, the company said. Sotheby's also said it needed cash to finance its **Internet** business and an expansion of its auction headquarters in New York.

Quicken.com moves to tighten security

Mountain View, Calif. --- Intuit Inc. said consumer information from its Quicken.com loan **Web site** was leaked to its advertisers, though it has taken steps to stop the leaks. Intuit said some financial information that was entered into its loan-calculation tools on the Quicken **Web site** was accidentally transmitted to DoubleClick Inc. Using the site, users can enter the size of...

... associated with consumers' identities, Intuit said. Intuit removed all DoubleClick ads from its Quicken loan **Web sites** to fix the problem.

Colorado public official settles SEC charges

Washington --- The Securities and Exchange...son and three of his law school classmates illegally made \$345,000 by using the **Internet** to manipulate stocks. Joanne Colt, a Colorado Springs City Council member, and her son, a Georgetown University law student, agreed to settle SEC charges that they used a **Web site** to promote four small stocks. After driving the stocks up as much as 700 percent...

...resort and spa.

> Chick-fil-A Inc.: The College Park company has been cited by **Restaurant Hospitality** magazine as the best quick-service **restaurant** to take kids to eat. It was among six winners selected in various categories.

Manufacturing...

...Aerospace on Wednesday that it considers labor talks at an impasse after Boeing's latest **offer** was **rejected**. That means that the company could

attempt to impose an agreement. Boeing said it missed...

...loans to lower-income borrowers.

Also ...

RealEstate.com: The Atlanta-based site is offering free **Web sites** to agents through its AgentPlus program. For information, call 1-888-Realestate.

Retail

Value of...

... a minuscule portion of overall retail sales in the United States. The department estimated the **online** sales to only be 0.64 percent of the \$821.2 billion in total retail...

... the company's stock price. PetsMart's strategy for growth is focused on strengthening its **Internet** and catalog businesses in addition to opening new stores, according to spokeswoman Lynne Adams. The...products let companies' customer service staff communication with customers by both e-mail and live **Web** chat. EShare is based in Norcross. Witness Systems, based in Alpharetta, offers software that lets...

... for electronic document management and work-flow solutions that enable document-centric commerce over the **Web**. Representatives from Xerox Brazil were visiting InterTech last week to form additional business ventures, as ...

... an Atlanta company developing products and technology to let users download digital content from the **Internet**, received a \$10 million second round of venture capital financing. The investment was led by...

...1.2 million in funding

> HomeToDo.com, an Atlanta area company that is developing a **Web site** to link homeowners with home maintenance service providers, said it received \$1.2 million in initial funding. The money will be used to develop the **Web site**, develop an Atlanta **network** of home-repair service providers and start marketing.

EAttorney.com receives \$3.4 million in capital

> EAttorney.com, an Atlanta-based company developing a **Web site** for lawyers, received a \$3.4 million second round of venture capital financing. Frontier Capital...

... earlier. Revenue passenger miles increased 6 percent on a 0.6 percent gain in seat **capacity**. The discount carrier said it received its ninth new Boeing 717 during the month and...

Heads Together Systems' BookingCenter is a property management system that automates **bookings**, guest rooms, sales, and other standard tasks. The product also includes analysis and reporting features, and links to the BookingCenter **Internet Reservation Services**, which supports **online booking** and marketing processes. BookingCenter saves guest histories for analysis. A front desk point-of-sale (POS) and property management system handles check-ins, check-outs, deposits, receipts, cancellations, and other processing. BookingCenter includes double-**booking** management, room availability, flexible room rate, and itemized guest accounting features. The system can add **restaurant**, telephone, and other charges to guest bills. BookingCenter can print a variety of financial, **booking** history, and revenue reports. It also **offers** agent commission analysis features. Daily reports can be saved, printed, or e-mailed. Files also can be exported to M.Y.O.B. and QuickBooks General Ledger. BookingCenter includes travel agent management features, letting users track agent turnover and payments. The system employs 128-bit SSL security technology. BookingCenter can be extended with the Group **Bookings**, Conferences Management, Call Accounting, and Owner Management add-on modules. The **online Booking** and Distribution Service includes **online reservation**, customer relationship management (CRM), marketing, and remote property management features. A free version of BookingCenter can be downloaded from, and an **online** presentation can be viewed at, the Heads Together Systems **Web site**.

BUSINESS Payroll may be configured to handle any company's payroll needs. It supports over 30 different payroll formulas, including: (1) hourly; (2) overtime; (3) double time; (4) salary; (5) multi-rate; (6) commission; (7) tips; (8) shift; (9) premiums; (10) special pay; (11) rent; and (12) vacation. It produces all required quarterly and yearly reports, W-2s and state forms. All federal, state and city/county/school taxes are supported. Twelve optional deductions and 16 deduction formulas (dollar, percentage, dollar-hourly, etc.) with deduction hierarchy and optional operator override are included. It also has automatic accumulation of quarter-to-date and year-to-date gross, all tax and deduction fields, and vacation fields. Features include: (1) 35 reports plus customized report generator; (2) tips routine and reporting; (3) separate vacation routines; (4) minimum wage and EEO/sex code reporting; and (5) optional calculation of unemployment for state of work. Optional modules include Labor Distribution, General Ledger interface, Check Reconciliation and Accumulator/Personnel File. All BUSINESS systems **offer** a lifetime warranty, multi-file/multi-user/multi-company **capacities**, unlimited file sizes and password security. Special **restaurant** payroll functions are available. Versions are available that support local area **network** systems.

Quack.com, Shoutmail, and Tellme are three new voice **portal** services that generally work well to allow people to use a phone and their voices to

retrieve current traffic and weather reports, financial news, stock quotes, **restaurant** reviews, and other useful information. The services could be attractive to business travelers and other regular users of cell phones. Calls can end unexpectedly as cell phone users move around in or out of the grid, but voice **portals**, says an analyst, will gain market share once users understand them. Providers of voice **portals** also plan to add shopping functions. Quack.com is the easiest to use of the three, and provides six categories of information: stocks, weather, traffic, sports, movies, and **restaurants**. Users can easily register at the **Web site** and sign up for customized, localized information. However, testers had trouble making the traffic feature understand their voices. Shoutmail competes well with Quack.com, and provides more categories of information, including horoscopes and plot summaries for soap operas. Voice commands are used less frequently than with Quack.com. Because users generally scroll through menus and choose information with the keypad, less phrase repetition is required. Tellme **offers** similar types of information, with some added niceties, including the ability to simply speak the name of an airline to be connected to its **reservation** number.

PRODUCT NAMES: Microsoft Streets & Trips 98 Windows 95 & NT (677302)

TITLE: Microsoft Expedia Streets 98 and TripPlanner 98

AUTHOR: Bertolucci, Jeff

SOURCE: Computer Currents, v15 n20 p35(3) Oct 14, 1997

ISSN: 8756-0046

RECORD TYPE: Review

REVIEW TYPE: Review

GRADE: A

Microsoft's Microsoft Expedia Streets 98 and Microsoft Expedia TripPlanner 98 get very good overall ratings for their trip planning tools. TripPlanner is a good choice for organized travelers who want customized maps, sightseeing guidance, and advice about all aspects of travel, including **restaurants** and camping sites in the U.S., Canada, and Mexico. Streets 98 provides particularized street maps, hotel and car rental information, and tools for downloading customized maps to handheld PCs. Both products have links to the Microsoft Expedia **World Wide Web** site, where users can make **reservations online** or navigate to other travel sites. TripPlanner has more travel information than anyone could ever need, including listings for 19,000 hotels, 17,000 **restaurants**, and 13,000 campgrounds, along with terrain-level maps for 75 national parks. TripPlanner also provide 3,000 scenic photos, 100 regional music clips, and many travel articles to please users. An excellent feature is the Route Wizard, an intuitive planner that **offers** particularized instruction on how to travel from one location to another. Expedia Streets 98 also lists thousands of **restaurants** and hotels, but it also has the ability to find exact street address for more than six million miles of U.S. roads in 150,000 cities and towns. When an address is typed in the Find Address dialog box, the address is shown on a color map. Smart Find provides close matches if the spelling is incorrect.

This review of CD-ROMs and **World Wide Web** sites provides information on those that can help a family plan its vacation, including valuable tips on how to maximize the use of multimedia trip-planning products. AAA Map'n'Go 2.0 from DeLorme Mapping Systems contains 1 million miles of routable roads, lists of AAA-approved accommodations, and reliable routes for destinations. Microsoft's Automap Trip Planner for the PC features multiple options for custom trip planning, quality printouts, and a full-featured **Web** site. Rand McNally's Rand McNally TripMaker 1997 for the PC contains an abundance of information about mapping and destinations as well as interactive wizards with optional narration that walk users through the trip-planning process. Road Trips Door-to-Door from TravRoute Software for the PC features solid trip-planning routes, but is short on attractions, lodgings and **restaurants**. The **Web** also features excellent sites, such as the one from Fodor's that **offers** advice and guidance on planning trips, **restaurants**, and hotels worldwide, but features no **reservation** service and few low-budget tips.

Travelocity.com, Expedia.com, Concierge.com, Fodors.com, Rec.Travel
Library, Arthur Frommer's Budget Travel Online, Internet Travel Network,
Travelscape.com, and Trip.com are travel sites that can help people book a
flight or plan a family vacation. Travelocity is easy and fun to use, and
after a flight, hotel, and car rental arrangements are made, the site
offers information about the local weather, **restaurants**, and
attractions. Expedia.com testers say that the site is 'terrific,'
'helpful,' and 'easy.' The home page provides all the tools needed to plan
a trip. A Specialty Lodging Wizard helps travelers find apartments, houses,
villas, and any other home away from home, and travel plans can be stored
in a personal itinerary page that can be accessed from anywhere.
Concierge.com will give tips to travelers on where to eat, play, and shop,
and there is a Bargains section for links to hard-to-find deals. Fodors.com
offers an instant mini-guide to a destination city. It has helpful tools
that **offer** computer-generated directions. However, the site may be of
little value for anyone going to out-of-the-way locales.

Cognizant Technology Solutions, an American company, hires thousands of software developers in India. This approach could be a 'logistical nightmare,' but results have been surprising. In an average customer **engagement**, Cognizant's on-site teams work with customers to define project requirements, review prototypes, and size changes. **When** the on-site team's **day** ends, an offshore team of software developers operates all through the night and earns much less than U.S. programmers. They design applications that 'best meet the customer's need.' Customers like Cognizant's business model, and Cognizant's revenue rose by 54 percent to \$137 million in 2000. Net income for the year was over \$177 million, and was up 57 percent over 1999. Even during the recent economic downturn, Cognizant's 1Q2001 income rose 61 percent to \$5.6 million. According to Kumar Mahadeva, CEO, 'Our ability to prosper in this market is a direct result of our proven on-site/offshore solutions delivery model. Cognizant has always emphasized income growth rather than revenue growth, and **when** such e-consultancies as iXL, Razorfish, and Scient collapsed in 2000, Cognizant's robust earnings and demonstrably effective business model protected it. Cognizant's partners include BEA Systems, Oracle, and Siebel Systems, and outsourcing contracts won include those with Darden **Restaurants**, The Body Shop, and RadioShack.

Extensible Markup Language (XML), UDDI (Universal Description, Discovery, and Integration), Simple Object Access Protocol (SOAP), and WSDL (Web Services Deployment Language) are standard protocols for the Web that, in addition to all applications that can be made available or delivered via the Web, will be part of Web services. Web services platforms are under development by Sun Microsystems, Microsoft, IBM, and Hewlett-Packard. They will send clients through the UDDI directory to locate a Web service. The Web service will then be translated into XML, which becomes a platform-independent wrapper for the Web service. Components communicate via Simple Object Access Protocol (SOAP), and the Web service is delivered back to the client, which also converses in XML and can assimilate the information. One company offering Web-based real-time restaurant reservations globally and with partners is OpenTable.com. OpenTable also makes its service, which also does restaurant reviews and credit card processing, through affiliate sites, including America Online. A spokesperson says OpenTable is a strong advocate for Web services, and supports UDDI, XML, SOAP, and WSDL. One example of a Web services platform under development is Microsoft .Net.

Over 20 companies provide online restaurant reservation services, but under 1 percent of restaurant reservations are made through the Internet. No one really believes that the telephone will ever be obsolete, but reservation service providers want to enhance all interactions between restaurants and customers, according to the CEO of Foodline.com. They will provide dining information and preferential reservations in order to fill more restaurant seats and increase profitability. Although first-generation Internet reservation services such as SavvyDiner.com and RestaurantRow.com can take up to 24 hours to confirm a request, newer technology available allows customers to make reservation requests in a hassle-free environment directly from their computers. The patron can log on to a restaurant Web site to see tables available or go to a portal site and search for a restaurant by name, cuisine, neighborhood, or desired dining time. A request for a reservation generally means an almost instant e-mail response. Some programs also allow customers to ask for a table by telephone or in person. Leaders in the market are OpenTable and Foodline, which have raised over \$16 million in venture capital, but only 361 restaurants out of 100,000 in the U.S. have signed on. Zagat.com and other companies are developing interfaces that act as clearinghouses for multiple reservation sites, and xTime's Web-based application is

accessible by consumer and **restaurant** via a browser from any computing device.

America Online, Ticketmaster Online-CitySearch, Road Runner, Lycos, and Excite are highlighted in a brief discussion of city guide sites. AOL Digital City is relatively uncluttered, with simple lists under each category designed to increase clickthrough rates. The search function tells users which sections of the site find keywords, and surfers get ample opportunity to express views, meet other surfers, and personalize the environment. Maps are the standout feature, but the site is better for residents than visitors, since finding a hotel is too difficult. Sidewalk is a richly comprehensive site, and tries to provide something for everyone. Local entertainment, a huge database of **restaurants**, hotels, sports, and other resources, as well as reviews of electronics and e-tailer search-and-retrieve tools are among its offerings. However, the new Compare.Net shopping service is not particularly efficient; making hotel **reservations** was too tedious and **time**-consuming. Ticketmaster Online-City Search does not have all the features of the separate CitySearch, but is a good source for genuine local color and important visitor information. Ticketmaster Online-City Search had the best hotel finder. Road Runner is a high-speed Internet service provider (ISP) that uses cable TV lines, and its local site provides a portal to the Internet; various other resources are then linked. Lycos' city guide is a series of hyperlinks, while Excite is also designed for travelers.

A discussion of hospitality and travel sites on the World Wide Web highlights Expedia, Discovery Online, Travelocity, Sheraton's site, Diners Club International, and Air Travel Card. These sites target frazzled leisure and business travelers who have little time to wait for paper brochures, and allow users to search for low fares while providing access to many other trip planning tools. These include destination-research tools and advice from experts. Users can also research travel bargains around the clock on the Internet. Analysts say that the quantity of airline tickets booked online will rise to \$827 million in 1997, up from \$276 million in 1996. This figure will likely increase by the year 2000 to \$4.5 billion. Many Web users have high incomes, education, and technical knowledge. Sites are easily accessible and user-friendly, and most are on the Web and can be reached through a standard browser. Secure servers and encryption methods secure credit card information and other personal data from those who should not see it. Sites receiving awards from GII in 1996 are Discovery Online and TerraQuest. Expedia is owned by Microsoft, and Travelocity, by The Sabre Group. Another analyst says the Web is ideal for information consolidation on one channel.

Starbucks' best-of-breed approach to providing for its supply chain operations is taking much longer than anticipated. After five years, the company only has five out of eight of the components of its system up and running. Problems with choosing the best-of-breed program over enterprise resource planning (ERP) solutions are several. First, it takes time to evaluate and set up a relationship with vendors. Integrating different software and new versions of software over time can prove difficult. Employees often leave over long periods of time as well, and projects are further delayed. The products Starbucks uses include HNC Software's SkuPLAN for forecasting, Numetrix's Schedule X for finite capacity scheduling, Oracle's GEMMS (Global Enterprise Manufacturing Management System), and Industri-Matematik's ESS System for order processing. Manugistics is

providing a variety of planning solutions. Data warehousing, purchasing, warehouse, and distribution, and transportation planning products have not yet been chosen. Green Mountain Coffee Roasters used an ERP system from PeopleSoft and expects the project to be done in two years. Other vendors suggest using an ERP and then plug-in in best-of-breed solutions to augment it. Some suggest that Starbucks do this with Oracle's products.

Microsoft's free Expedia travel software presents users with a Web-based travel **reservation** system. The intuitive program presents travelers with a single source for planning a trip. Consumers can reserve air travel, hotel rooms, and rental cars online, and search through an electronic travel guidebook. The Web site also gives visitors volumes of information such as **restaurant** listings, city maps, sightseeing details, and more. The handy Flight Wizard airline **booking** module is one of the easiest **reservation** systems available. Users can search flights offered by nearly 700 carriers to find the lowest fare, best airline, nonstop service, or preferred **time of day**. The program will link all air, car, and hotel segments of an itinerary together, presenting users with a final list of what is being accessed where. The hotel directory lists over 25,000 hotels and it can be searched by location, amenities, price, or other parameters. Safe transactions are ensured through Secure Socket Layer, or users can choose to call a toll-free number to provide credit card data.

This is an overview of the many travel **reservation** features to be found on the various online services. Detailed information is given on the larger commercial travel features. Eaasy Sabre is the same program used by more than 10,000 travel agencies, and it can be accessed through most online services. It includes a Bargain Finder feature and the ability to purchase tickets via the computer and have them sent to your home. Electronic Edition Travel Services (EETS) includes real- **time** flight information allowing users to check on the status on flights in progress. Worldspan Travelshopper is similar to Sabre. Online services also have information on hotels, **restaurants** , passports and visas, and a host of other travel topics.

PurchasePro.com, an electronic procurement (e-procurement) market, provides smaller and mid-sized companies with access to service offerings for the hospitality industry. PurchasePro began in 1997 as a provider to large clients, including hotels, casinos, and **restaurants**. Hospitality companies use the PurchasePro exchange to purchase all types of items, including office supplies, towels, and food. However, PurchasePro now also provides some new marketplaces through which custom-branded exchanges for internal procurement or public-facing exchanges can be constructed. PurchasePro also set up an economically priced fee model that allows buyers or suppliers to participate in any of 160 PurchasePro-run marketplaces for a per transaction fee of about \$12. PurchasePro also has partnerships with America Online, Netscape Communications, Computer Associates International, and I-Storm. PurchasePro, which built and maintains its own technology and data center, hosts all marketplaces, including product catalogs, at a

single facility. The facility has three DS3 (about 45Mbps) connections, which run at about 20 percent of **capacity** . Internet service providers (ISPs) used are Sprint, AT&T, and Global Crossing. A three-tiered architecture includes the database layer; a middle tier for business logic and **rules** that were developed with Microsoft Component Object Model (COM) objects; and a presentation layer as the top tier.

... through reservations.

The Oyster Bar does ask for a telephone number at the time the **reservation** is made and occasionally requires a deposit for a larger party, but in general, the **restaurant's reservation** policy is quite straightforward. However, the time of the **reservation** is strictly observed: If the party is more than 5 or 10 minutes late, the table is released. A high level of walk-in traffic affords the **restaurant** the luxury of nearly always being able to fill the table. Perhaps the 19-unit Schwartz Brothers **Restaurant Co.**, based in Bellevue, WA, has the most enviable solution to the problem of juggling **reservation** customers and walk-in traffic. The company has three **restaurants** in a Seattle office/shopping complex called Chandler's Cove. Two of the **restaurants** are upscale, full-menu **restaurants** and **accept reservations**, while Cucina! Cucina!, which **offers** gourmet pizza and pasta items, does not. Says company president Bill Schwartz, "When walk-in...

...the three establishments, the host simply picks up the phone and connects with the other **restaurants** to cheek for openings. At least people don't get turned down for dinner."

Title: Amadeus takes to the air (computer reservation system)

Author(s): Reed, A.

Journal: Business Solutions no.4 p.23-5

Publication Date: Spring 1990 Country of Publication: UK

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: Within a few years from now, the majority of travel agencies will be plugged into vast data banks, currently being established by consortia of airlines, so that the world and its air, train and ferry services, car hire, hotel rooms, theatres and **restaurants** will be, literally, at the fingertips of the clerk behind the counter. Technologies such as the Unisys-based Amadeus Computer **Reservation** System (CRS) **offer** much more than just a **booking** facility for travel agents. Under the Amadeus umbrella, the individual CRSs of a number of European countries are linked together to **offer** a cornucopia of travel information to service subscribers. And the **network** is spreading. At the time of writing, Amadeus had 25 hotel groups and **reservations** services signed as associates, four car hire chains, and SNCF (French railways). (0 Refs)

Title: Lines of communication-computerised systems in hotels

Author(s): Chalmers, K.

Journal: Communications vol.2, no.5 p.27-8

Publication Date: May 1985 Country of Publication: UK

CODEN: CMMNE7 ISSN: 0266-8009

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: Efficiency is central to the standard of service which a hotel can **offer** its guests. Computerised hotel systems available can automate every aspect of hotel management, from **reservations** to the minibar, offering guests a significantly faster response, and for the hotel, tighter management control over ever rising food, beverage and staffing costs. Industry software packages are available to cover most areas of hotel administration but they are generally not integrated and not all available from the same supplier. Ideally a system should consist of hardware with the power to run a wide range of applications now and in the future. It should **offer** integrated **restaurant** and bar management. Communication facilities are equally important as the hardware and software within the hotel itself to provide instantly available up-to-date information. Within major hotel groups, **networked** remote terminals in each location should be linked to a central processing unit at head office. (0 Refs)

Title: Just like the electronic home (hotel communications)

Author(s): Boyce, A.F.

Journal: Communications vol.2, no.5 p.19-21

Publication Date: May 1985 Country of Publication: UK

CODEN: CMMNE7 ISSN: 0266-8009

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: Hotels have always tried to be a home from home, and as travellers' homes become wired up as part of the information revolution, so must hotels' guestrooms. At present there seems to be two main sorts of services emerging: straightforward entertainment, and what might best be grouped together as interactive personal services. The development of entertainment can be seen rather more clearly, and will comprise the existing radio and TV channels, plus cable and DBS. For the interactive services to develop we shall have to get addicted to teleshopping and homebanking at home before we find we cannot do without it in our hotel. However, there are striking opportunities for communications services which are specific to a hotel which one can expect the more enterprising properties to latch onto sooner. For example, **online** credit and/or

debit-card validation and payment; self checkin and checkout, the latter via the room TV or telephone, which at last **offers** a real change to abolish the dreaded morning checkout queue; automatic ordering of meals and **restaurant seat reservation** . (0 Refs)

A ticket to dot-com heaven? -- Ticketmaster's online service offers high hopes

Weintraub, Arlene; Mullaney, Timothy J; Yang, Catherine

Business Week , April 10, 2000 , n3676 p87-88, 2 Page(s)

ISSN: 0007-7135

Company Name: Ticketmaster

Languages: English

Document Type: Articles, News & Columns

Geographic Location: United States

States that since the merger of Ticketmaster **Online** with City Search of Pasadena, CA in November 1998, the company has been driving to create a virtual datenight.com. Cites the oft-resented ticket service's plan to turn into a giant **Internet portal** where people can get local information about entertainment and act on it by making **restaurant reservations**, lining up a date, or purchase theater tickets as well as printing the actual ticket. Adds that CitySearch draws **Web** surfers by offering local entertainment listings and receives revenues from advertising, auctions and hosting **Web** storefronts. Highlights Ticketmaster's acquisition of MSN Sidewalk, Match.com, One & Only **Network** and CityAuction. Notes strategic partnerships with Kozmo.com, Evite.com, and CultureFinder.com. Reports Ticketmaster **Online** made \$16 million last year but combined with CitySearch lost \$42.7 million on revenues of \$105 million. Contains one chart and one figure. (sps)

OpenTable.com -- Restaurants computerize reservation systems, diners make bookings online via startup's device

Andrews, Whit

Internet World , April 15, 2000 , v6 n8 p32, 1 Page(s)

ISSN: 1081-3071

Languages: English

Document Type: Articles, News & Columns

Geographic Location: United States

Discusses OpenTable.com (\$100 per month), which lets **restauranters** utilize a **reservation** management system that can identify good customers, eliminate the need for a hardcopy **reservation** book, and offer

the possibility of database marketing, meal planning, and enhanced customer service. Indicates that OpenTable is seeking to serve as a concierge for evening planning, offering dinner **reservations** as well as parking **promotions**, flowers, event **reservations**, and premium dining. Notes that OpenTable is funded not only by venture capitalists, but also by American Express, Zagat's, and New York's Lettuce Entertain You Enterprises. Says that OpenTable allows **restaurants** ways to easily provide discount **diners** in order to fill otherwise empty tables, without having to use an Early Bird Special, which may not be sufficiently targeted to provide good results. Includes one photo and a company summary. (jon)

Excite Travel by City.Net

Leger, Jill

PC Magazine, January 6, 1998, v17 n1 p186, 1 Page(s)

ISSN: 0888-8507

Company Name: Excite

URL: <http://www.city.net>

Product Name: Excite Travel by City.Net

Languages: English

Document Type: Software Review

Grade (of Product Reviewed): C

Geographic Location: United States

Presents a mixed review of Excite Travel by City.Net (free), an **online** travel service from Excite Inc., Redwood City, CA (650). The site provides thorough coverage of a great number of cities worldwide, including facts on cities, passport and vaccination requirements, and recommendations for hotels, **restaurants**, and places for sightseeing. The site is not very

effective for **booking** travel. The **home page** presents a world map which allows the user to pull up information on 5,000 destinations. Clicking on a location takes the user to internal sites and map links. Travel books are referenced through a link to Amazon.com and a travel-news area **offers** timely articles arranged by category. The **reservation** area is powered by Preview Travel which provides the same features except that Excite Travel does not **offer** vacation packages. Includes one screen display. (djd)

Have database will travel -- Part 1: online travel databases

Jacso, Peter

Database , August 1, 1995 , v18 n4 p14-26, 11 Page(s)

ISSN: 0162-4105

Languages: English

Document Type: Feature Articles and News

Geographic Location: United States

Presents the first of a two-part series of articles discussing **online** travel databases. Examines the travel and tourism information and services offered by several commercial **online** services, including CompuServe, Prodigy, and America **Online** , among others, which **offer** hotel and **restaurant** guides and **reservations** , bed and breakfast information, airline ticket sales, and extras like obtaining a visa for foreign travel. Explains how databases can be used to provide complete travel information for business and leisure trips, but warns that many times special package deals are not included as part of the information at hand. Notes that travel information on CD-ROM databases will be discussed in part two. Includes three screen displays, two examples, and one comparison chart. (CH)

 Minor Group's e-commerce plan eyeing new markets
 THAILAND: MINOR CHARTS OUT E-COMMERCE PLANS
 The Nation (XBO) 29 Sep 2000 Online
 Language: ENGLISH

Thailand's Minor Group, which has interests in hotels, trade and **restaurants**, is set to embark on an e-commerce foray. The e-commerce plans will kick-off in mid-2001, when Minor Group will **offer online hotel reservation bookings**. Its other target will be its trading business. Minor Group hopes to **offer** business-to-business (B2B), business-to-consumer (B2C) and business-to-employee (B2E) e-commerce initiatives by October 2002. Its trade business basket is filled with fashion apparel, golfing accessories and clothing, stationery and kitchenware brands. Soon, its fashion apparel brands of Esprit and EDC will be joined by a pricy brand from the Acadia Group of UK, while cosmetics lines from Australia and France are being eyed to complement its existing Red Earth line of cosmetics.

PhileoAllied coming out with new products
MALAYSIA: PAL INTRODUCES NEW CONCEPT IN BANKING
New Straits Times (XAS) 16 May 2000 p.26
Language: ENGLISH

PhileoAllied Bank (Malaysia) Bhd (PAL) has carved its name as the first banking institution in Malaysia to adopt a new banking concept. The pioneering concept is in the form of PAL@McDonald's which was officially introduced on 15 May 2000 at Damansara Uptown 5 (Petaling Jaya, Selangor, West Malaysia). The PAL@McDonald's machine is equipped with four various features, namely, PAL Phone (for telephone based banking services); PALPoint (offers ATM, automated teller machine services); PALWorld (offers travel reservations , shopping, investing and banking services) and PALDirect (offers investing and banking services via the Internet). The service can be accessed at the McDonald's fast food restaurant in the area by PAL's clients. On another note, Tong Kooi Ong, the chief executive officer at PAL has said that the bank will soon come out with two product offerings specifically aimed at facilitating financial investment deals and online banking with electronic banking in mind.

MOROCCO: MORE INFORMATION TECHNOLOGY IN BUSINESS
L'Economiste (AGU) 11 Mar 1999 p.10
Language: FRENCH

A plan covering the period 1999-2003, proposed by the Minister for industry, commerce and the craft industry, aims to increase the use of information technology in small and medium businesses in Morocco. The project, costing MDh 73mn (helped by European Union aid), will cover four main areas. Firstly, the creation of a multimedia park (MDh 6mn) which will have the capacity to welcome 20 businesses and will house a conference centre. Secondly, an IT centre which will develop partnerships, professional co-operation, project follow-up and prospecting in the IT sector. Thirdly, the promotion of e-trade (MDh 2mn), for which 5 pilot projects have been set up, including a virtual fish commodities trading market and a network linking travel agencies, transport companies, hotels, restaurants and museums. Finally, to help businesses integrate technology into their activities (MDh 50mn). The programme will target 350 companies. Each chosen company will receive aid of up to MDh 160,000

Frequent buyers point airlines further afield

AUSTRALIA: MORE **REWARDS** BY ANSETT/QANTAS
The Australian Financial Review (AFR) 10 January1996 P.1
Language: ENGLISH

As of October 1995, unused points from card-carrying users of Ansett, the Australian airline, have increased 42.2% to AU\$ 347 mn, while Qantas has increased 82.5% to AU\$ 28.1 mn as at end of 1994-95. A total of AU\$ 370 mn unused flights have been collected from the 50% increase in members in 1994, which was at 1.4 mn. The accumulation was due to members hanging on to their points so as to broaden their travel options with the extension of use-by deadline from 2-5 years by both airlines as another cause. The users pay for everything from hotel rooms, to home renovations, rental cars, **restaurant** meals through their companies tapped into the flyer **networks**. To cut down the number of travel options, Qantas has planned to improve the position of those travelling between Australia and the regions, which include the internationalisation of flyer program by stepping up earning and burning points in Asia. Qantas is improving its program in Europe and US through its development with British Airways and other US carriers. In other words, both Ansett and Qantas have planned to place more emphasis towards international travel benefits to cut down the higher points-earning **capacity**.

Euro Disney sort du rouge

FRANCE: EURO DISNEY'S RESULTS UP IN 1995

Le Figaro (XMV) 16 Nov 1995 p.50

Language: FRENCH

The France-based amusement park Euro Disney is to extend its **offer** of services to increase its global sales. This includes the creation of a new unit in Summer 1996 by the **network** of **restaurants** Planet Hollywood, and doubling the seminars and congress **capacity** as of 1997. The moves occur as the average expenses per visitor fell 10% to FFr 224 in the year 1995, due to Euro Disney revising its tariffs down. On the brighter side, this led to sharp increase of the number of people going there, to 10.7mn in the fiscal year ending on 30 September 1995, versus 8.8mn the year before. Euro Disney's turnover rose FFr 0.5bn to FFr 4.6bn in 1995, and the group posted a net profit of FFr 114mn, for the first time since it had opened back in April 1992.

Our own cybercafe to open by Xmas

MALAYSIA: THE FIRST CYBERCAFE TO OPEN SOON

The Star (XAT) 10 Oct 1995 P.4 In-Tech

Language: ENGLISH

In Malaysia, WebMedia Sdn Bhd, two undisclosed IT pioneers in Malaysia and Dave's Deli founder David Chin have established a company to set up "CyberCafe". CyberCafe will be a delicatessen and it will have a **capacity** to seat 40 people. It will be equipped with computers. It allows **diners** to access the **Internet** at a fee of RM 15 per hour. For students, a **discounted** fee will be offered. CyberCafe will also be a place for PC vendors to display their latest PC technology. The first CyberCafe is scheduled to open in December 1995 at Plaza Damansara, Kuala Lumpur, Malaysia.

Material Identity Number: P301-2000-004

Language: English **Document Type:** Journal Paper (JP)

Treatment: Practical (P)

Abstract: Hot spots are a major obstacle to achieving scalability in the **Internet**. At the application layer, hot spots are usually caused by either (a) high demand for some data or (b) high demand for a certain service. This high demand for data or services, is typically the result of a real-life event involving availability of new data or approaching deadlines; therefore, relief of these hot spots may improve quality of life. At the application layer, hot spot problems have traditionally been dealt with using some combination of (1) increasing **capacity**; (2) spreading the load over **time**, **space**, or both; and (3) changing the workload. We note that the classes of solutions stated above have been studied mostly in the context of applications using the following types of communication (a) one-to-many, (b) many-to-many, and (c) one-to-one. However, to the best of our knowledge there is no existing work on making applications using many-to-one communication scalable and efficient (existing solutions, such as **web** based submissions, simply use many independent one-to-one transfers). This corresponds to an important class of applications, whose examples include the various upload applications such as submission of income tax forms, conference paper submission, proposal submission through the NSF FastLane system, homework and project submissions in distance education, voting in digital democracy applications, voting in interactive television, and many more. Consequently, the main focus of this paper is scalable infrastructure design for relief of hot spots in wide-area upload applications. The main contributions of this paper are as follows. We state (a) a new problem, specifically, the many-to-one communication, or upload, problem as well as (b) the (currently) fundamental obstacles to building scalable wide-area upload applications. We also propose a general framework, which we term the **Bistro** system, for a class of solutions to the upload problem. In addition, we suggest a number of open research problems, within this framework, throughout the paper. (14 Refs)

Title: The wander of the world [WAP]

Author(s): Ford, P.
Journal: Business & Technology p.43-4
Publisher: Reed Business Information,
Publication Date: May 2000 Country of Publication: UK
CODEN: BUTEFR
Material Identity Number: F338-2000-005
Language: English Document Type: Journal Paper (JP)
Treatment: Practical (P)

Abstract: Much of the hype around WAP has focused on what it can do for the individual. As high-speed standards like GRPS, then UMNIS, finally arrive, location-dependent information will be pushed out to users who are 'always' connected to the Internet. Cinema listings, the site of the nearest ATM, restaurant bookings and other information will combine with real-time stock market updates and e-mail alerts to turn mobile phones, organisers and palmtops into indispensable consumer accessories. But what's in it for business? Or is it the next phase of the IT infrastructure evolution that will really take your corporate services into new levels of interactivity and productivity?. (0 Refs)

Language: English Document Type: Journal Paper (JP)

Treatment: Theoretical (T)

Abstract: Consider the problem of determining capacity expansions within a service industry composed of a chain of existing and new facilities, e.g. restaurants, hotels and gas-stations. The desired solution is a schedule of capacity expansions, each consisting of size, location and timing, in order to maximize profit when only limited funds are available. The authors include two models. The first is a linear programming model suitable for organizations which rent or lease their facilities. The second is a mixed integer programming model where a fixed cost is paid any time capacity is expanded. For the linear programming model we show how to represent the problem as a generalized network with gains problem and, in a case of non-decreasing demands, as a linear multiple-choice knapsack problem. For the mixed integer programming model we develop a heuristic having complexity $O(n \log n)$ which makes it appropriate for large scale problems. (23 Refs)

Treatment: Applications (A)

Abstract: By producing ALEX, the first North American videotex service offered by a major telco, Bell Canada enabled users to conduct business and personal transactions while never leaving the comfort of their homes. With applications that range from comparing prices and ordering merchandise to playing electronic games, the **online**, interactive service-named in honor of Alexander Graham Bell-is becoming a popular addition to a growing number of Canadian households. For example, using ALEX, customers can choose to check the balance of their bank accounts, preview movie listings, reserve seats for local entertainment or sporting events, make **restaurant reservations**, shop at home, check stock market prices, or consult road **conditions**. The system serves as an information gateway to more than 260 applications offered by 70 service providers. (0 Refs)

Strategic planning under uncertainty: Stochastic integer programming approaches

Author: Ahmed, Shabbir

Degree: Ph.D.

Year: 2000

Corporate Source/Institution: University of Illinois at Urbana-Champaign (0090)

Adviser: Nikolaos V. Sahinidis

Source: VOLUME 61/10-B OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 5494. 145 PAGES

Descriptors: ENGINEERING, INDUSTRIAL ; OPERATIONS RESEARCH

Descriptor Codes: 0546; 0796

ISBN: 0-599-97352-8

Recent developments in the area of stochastic programming have resulted in considerable success in optimal decision making under uncertainty. However, much of the work in this area has been **restricted** to linear models, which are often inadequate in dealing with the combinatorial nature of decisions in many strategic planning problems. Consequently, researchers have proposed stochastic integer programming formulations. Owing to the non-convexities associated with the value function of integer programs, this class of problems is extremely difficult

to solve. This thesis is concerned with the development, analysis, and implementation of exact and heuristic algorithms for stochastic integer programs with application to strategic planning under uncertainty.

In the first part of this thesis, we address a general class of two-stage stochastic integer programs with discrete distributions. Various stochastic location and resource allocation problems can be formulated in this manner. We exploit the structure of the value function of the second stage problem to develop a novel global optimization algorithm. The proposed scheme departs from those in the current literature in that it avoids explicit enumeration of the search space while guaranteeing finite termination.

The second part of this thesis addresses a class of multi-period, multi-facility **capacity** expansion problems. We first prove that the problem is NP-hard. Subsequently, we develop heuristic strategies for the deterministic and stochastic versions of the problem and prove, via probabilistic analyses, that these heuristics are asymptotically optimal as the number of planning periods increase. Applications addressing manufacturing technology selection and **capacity** expansion of chemical processing **networks** are presented.

In the final part of this thesis, we address a class of stochastic programs with discrete first stage decisions and decision-dependent uncertainties. These problems are formulated as 0–1 hyperbolic programs for which we use the theory of convex extensions to develop a reformulation scheme and an exact solution strategy. The proposed methods are used in a case study for locating **restaurant** franchises.

ISBN: 0-315-99321-9

As Canada has become more urbanized, rural communities have had to undergo difficult changes to survive. Wells, British Columbia, like many traditional resource-based communities in British Columbia, is looking to tourism to stabilize the boom-bust cycles that have plagued its existence. Although its population has declined to 200 people, it is experiencing **limited** growth due to a growing number of people who are choosing to live in and visit small communities due to amenities such as environmental quality, outdoor recreation opportunities, and rural and historic ambiance. This Master's Degree Project examined a **network** of recreational trails adjacent to the community and suggested ways in which this amenity could generate more value to the community.

An inventory of the trail **network** was conducted indicating the location, **condition**, current use, suggested development, and management concerns. A number of development projects were prioritized using a set of criteria that maximized benefits to the local community. An inventory of the support facilities in the local community examined the type and **capacities** of the accommodation, **restaurants**, camping, retail, transportation and commercial outfitting sectors, as well as the local events, attractions and entertainment.

Using available data, the study examined the potential winter demand for the trail **network** and raised a number of marketing issues for future consideration by the community. The conclusions include a number of recommendations for trail work, signage, trail grooming and marketing as well as pointing the way to future research that could be undertaken by the community.

CHINESE WITHOUT A CHINATOWN (WISCONSIN)
Author: HUANG, MAURINE FOSTER
Degree: PH.D.
Year: 1988
Corporate Source/Institution: THE UNIVERSITY OF WISCONSIN - MILWAUKEE (0263)
SUPERVISOR: EDWARD WELLIN
Source: VOLUME 49/12-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 3774. 359 PAGES
Descriptors: ANTHROPOLOGY, CULTURAL; SOCIOLOGY, PUBLIC AND SOCIAL WELFARE
Descriptor Codes: 0326; 0630

Research conducted among the Chinese in Milwaukee, Wisconsin, revealed that most theoretical models were inappropriate for the study of a phenotypically distinct population composed of a large proportion of immigrants from widely diverse backgrounds. "Adaptation," the model on which this research is founded, includes: adaptive **capacity**, opportunity structure, adaptive strategies, and social support **networks**.

The research found that the dispersed residential pattern characterizing the Chinese in Milwaukee depends on social support **networks** and voluntary associations for the maintenance of ethnic ties. The continuing stream of in-migrants has been instrumental in maintaining a high level of intra-ethnic diversity.

The Chinese in Milwaukee divide themselves into three communities, depending on **time** of and reason for immigration, Chinese language spoken, education, occupation, and social support **networks**. These are the "**restaurant** people," whose immigration stream began some 100 years ago; the "professionals," who began immigrating after World War II; and the "Taiwanese," members of the Brain Drain who are from Taiwan and who refuse to identify themselves as Chinese or participate in Chinese voluntary associations. American-born members of all three groups maintain ties with their parents' **networks**, but do not form a fourth group of their own.

The significance of this research lies in the demonstration of the importance to the communities of voluntary associations, informal ties, and continuing in-migration. In that Milwaukee Chinese have never lived in a concentrated ethnic enclave, they have relied on voluntary associations and informal **networks** to maintain a community. In addition, in that approximately half of the Milwaukee Chinese aggregate is comprised of immigrants, the research shows the importance of continued in-migration for the maintenance of intraethnic diversity.

Grade (of Product Reviewed): C
Geographic Location: United States

Presents a mixed review of AAA Map'n'Go 6.0 (\$25), personal trip planning software from DeLorme (800). Says that for trip planning, AAA Map'n'Go is a strong research tool, with detailed, rated listings of lodgings, **restaurants**, campgrounds, and attractions from the AAA TourBook guides; exit-service reports supplement the maps. Notes, however, that the program lacks a comprehensive address database: Street-level data is **limited** to 241 urban areas. Notes that Map'n'Go supports GPS devices, and downloads maps and directions to Palm OS PDAs. Comments that the maps display routable roadways in North America with multiple search options and customization tools. Points out that via the **Internet**, weather, construction, and local-event updates, but no **reservation** links, available. Says that a good feature is the ability to print a Trave Plan package with map views, directions, and TourBook item Includes a screen display. (mas)

Product Name: WorldCities 2000 New York

Languages: English

Document Type: Product Announcement

Hardware/Software Compatibility: IBM PC Compatible; CD-ROM Drive

Geographic Location: United States

Announces the introduction of World Cities 2000 New York (\$49.95) from ImaginOn, Inc. Says that it is the second city of four in the company's planned Volume One of its interactive CD/ **Web** travel planners. Describes it as a set of three CDs that features over 120 minutes of original video footage of New York that captures everything from the downtown end of Battery Park to the uptown heights of the Cloisters and all the art, culture, business, sports, entertainment, **restaurants** , and stuff in between. Relates that the virtual traveler can explore every part of the city and click the Go **Online** Button at any **time** , which opens ImaginOn's built-in browser and transports the traveler to any of the more than 1,000 **Web sites** featured in the title. Says that information can then be obtained, **reservations** booked, and plans confirmed. Notes that the first city in the series was San Francisco and the third, Paris, debuts soon. Includes one illustration. (KMH)

Product Name: Cool Travel Assistant; Map Quest; Horizon Maps; Switch Board

Languages: English

Document Type: Articles, News & Columns

Geographic Location: United States

Presents many uses for carrying a laptop computer while on vacation, including **reservations** , navigation, education, self-preservation, documentation or internalization, digitization, communication, anthropological recreation, inspiration, and desperation for the workaholic. Recommends **Web site** Cool Travel Assistant for routing, airline, hotel, rental car, and **restaurant reservations** and Map Quest or Horizon Maps for navigation. States that phone numbers can be found at Switch Board **Web site** . Indicates that search engines can direct one to history or cultural sites that are age-appropriate. Says that digital cameras are great for sending electronic postcards or for creating screen savers. Notes that e-mail can be read while on the trip and that perhaps a bit of relaxation will bring forth answers to work-related questions that can be analyzed on the laptop. Contains five photos. Venky's aims for larger pie in processed chicken segment

INDIA: FACILITIES TO BE UPGRADED BY VIL

The Times of India (TSI) 13 Oct 2000 p.19

Language: ENGLISH

In India, the packaging and processing facilities at the plant in Kamshet adjacent to Pune will be upgraded by Venky's India **Limited** (VIL) of India, said Venkateshwara Hatcheries group chairperson and managing director, Mrs Anuradha J Desai. The distribution **network** for chicken-in-minute (CIM) products will be enhanced by VIL, while deep freezers at franchise outlets and cold storage facilities for wholesalers will also be made available by the firm. For the expansion plans, some RS 4 crore will be invested by the firm and will come from internal accruals of VIL. The plant possesses 4,000 birds per hour of slaughtering **capacity** at present. Processing **capacity** of quick service **restaurant** (QSR) products, chicken-in-minute (CIM) products and boneless chicken will also be hiked under the plan for expansion. The firm will focus on processed food division in view of the growing fast-food chains and convenience foods in India. VIL will venture into more cities for the chicken-in-minute (CIM) products. For the said products, product line-up will be enhanced by VIL, which will increase the number of outlets by double. VIL was known as Western Hatcheries **Limited** before this.

Try **online** shopping for free
SINGAPORE: NECECITY.COM LAUNCHED
The Straits Times (XBB) 05 Jul 2000 p.51
Language: ENGLISH

Nececitiy.com, an e-commerce site, has been launched in Singapore. In an effort to educate people on e-shopping, it will give visitors to Plaza Singapura a chance to shop **online** for free. For two **days** (8 and 9 July 2000), shoppers can make one purchase each, from a selection of about 20 products. About 6,000 items will be offered. Nececitiy.com expects to achieve US\$ 1 mn in revenue in 2000. It has already signed on more than 300 Singapore traders and over 1,000 Chinese companies offering products and services such as clothing, food and **restaurant reservations**.

Mobiles that log on to the Net are a turn-off
UK: USERS DISAPPOINTED WITH **INTERNET** ACCESS PHONES
Daily Mail (DML) 26 May 2000 p.23
Language: ENGLISH

Research by Ovum <UK> has found that customers have been largely disappointed with the first mobile phones capable of logging on to the **Internet**. Although around 500,000 have acquired WAP (wireless application protocol) handsets, the majority consider that they have failed to live up to expectations. Accessing **websites** is thought to be slow, and the choice **limited** and text-based. **Online restaurant** and transport **bookings** and other useful services seem difficult to locate, and **online** charges are thought to be excessive. The report, which is likely to worry mobile operators who have recently paid GBt 22bn on third generation licences, criticises companies for over-emphasising the **Internet** capabilities of the phones.

Pierre to expand sales of Minere

THAILAND: PIERRE VITTEL'S NEW INVESTMENT
Krungthep Thanakit (AUF) 9 Dec 1999 p.24
Language: THAI

Mr. Urban Faye, Managing Director of Pierre Vittel (Thailand) Company Limited, announced an additional investment of B 550 mn (US\$ 13.8 mn) for its mineral water "Minere". The investment will be used for the expansion of production capacity, increase in promotional and advertising activities, and improvement of its distributing network. The expanded capacity is expected to be completed by 2000. In addition to the increased capacity, the company will also change the packaging for Minere. The additional investment is in line with the recent expansion of the food and beverages businesses of the Nestle Group, the parent of Pierre Vittel. Nestle had already spent B 1,500 mn (US\$ 37.5 mn) to expand its canned milk factory, and B 165 mn (US\$ 4.1 mn) to expand its Coffeemate factory in Thailand. Minere is the current market leader in the growing mineral water market in Thailand with a 45% market share. The market share improved by 20% in 1999 because of the introduction of home delivery services and the entry into hotels and restaurants.

Nichts f r k hle K6pfe
GERMANY: REVIEW OF BEER MARKET
Lebensmittel Praxis (LS) 04 Jun 1999 p.46
Language: GERMAN

In 1998, sales by German breweries fell by 2.9% to 109.4mn hl of beer, of which 100.1mn hl was sold in the home country. Per-capita consumption fell by 2.7% to 127.4 l. While restaurants saw almost double-digit fall rates, retail sales decreased only by 2.5%. An important but ignored reason for the decline is said to be the fact that young people spend more time with computers and the internet, which requires a cool head. Therefore, they prefer functional drinks such as green tea, coffee and vitaminised drinks to beer and other alcoholic drinks. Over-capacity in the German beer industry is estimated at 30-40%. Therefore, retail prices remain stable while producer prices are increasing. Branded beer cost on the average DM 1.83 per litre in 1998, private labels DM 1.42. Consolidation is expected in the German brewery industry. However, in 1998, the number of breweries grew by 10 to 1,238, of which 696 are located in the state of Bavaria. The reason for the increase is said to be the renaissance of small house breweries. To increase sales, breweries are focusing on new packaging rather than product innovations. In 1998, a most successful type of beer packaging was the 5-l party keg, sales of which grew by 15%. While beer sales in 0.5-l cans grew by 4.9% to 9.36mn hl, 0.33-l cans lost importance further.

Relais & ChSteaux renforce ses atouts/

FRANCE: RELAIS & CHATEAUX IS DOING WELL

La Tribune (XOT) 25 Mar 1999 p.20

Language: FRENCH

In addition to a new US-based call centre, Relais & ChSteaux will benefit of an interface with the largest existing **booking** systems: Amadeus, Galileo, Sabre and WorldSpan. The French hotel and **restaurant** group has improved its **booking** scheme thanks to the US company Rezolutions. A partnership with United Airlines allows passengers to collect miles every **time** they stay in any of the group's establishments, while the **Web site** reports 500,000 pages viewed a month. These are some of the group's efforts to increase its audience. Relais & ChSteaux did well in 1998 with sales of FFr 6.5bn, up 5.3% from 1997 including FFr 2bn for the 144 France-based units (out of a total of 415 world-wide), up 9.3%. **Restaurants** account for 54% of the total sales (64% in France) compared to 42% for hotels.

The bank that likes to sort out your life

UK: NATWEST LAUNCHES ZENDA INFORMATION SERVICE

Daily Telegraph (DT) 27 Aug 1998 p.25

Language: ENGLISH

NatWest Group, the <UK bank> has spent a "few million pounds" on its new information service called Zenda, which it claims is the first of its kind in the world. The service will hopefully benefit customers who have too little **time** to look up information themselves, but are prepared to pay GBt 5 per month initially. However, non-NatWest customers may also subscribe to the service. Zenda will supply traffic and travel information, weather reports, local news and sports results in addition to a car buying option, and the information may be sent via a number of channels including the telephone, fax, **internet**, post as well as via message pager. During the six-month trial, NatWest hopes to that as many as 5,000 customers will subscribe to Zenda, and hopes to extend the service in the future to include a wedding planing service and a **restaurant booking** option which could see the subscription cost rise to GBt 10 or GBt 15 per month.

Un environnement L4G pour un systeme de **reservation**

FRANCE - DEVELOPMENT OF BRITTANY FERRIES **RESERVATION** SYSTEM
Zero Un Informatique Hebdomadaire (ZH) 3 July 1992 p27
Language: French

Brittany Ferries, anglo-French consortium of travel agencies, is developing a new **reservation** system in preparation for competition from the Channel tunnel. Work on developing the system, the cost of which will total FFfr100 mil, has been under way for a year. **Scheduled** to come into service on 15 October 1993, the new system will handle the management of hotel and **restaurant** services and of loading as well as passenger and freight **reservations**, accounts and inventory. Integration will be a major feature of the new system which will replace a system that runs on a range of different hardware and in which passenger and freight business are separate. As well as having to operate 24 hours a **day** and provide a reply to enquiries from some 600 users located at 12 sites in just 1 sec, the new system has to be capable of handling the rapid changes in product offerings and sales concepts involved in the fiercely competitive tourism sector. Brittany Ferries studied specifications for 18 months before deciding that its new **reservation** system should be based on a client/server architecture and on the APT 4GL development environment from Sybase. The Sybase relational database management system will run on a central system consisting of two VAX 6600s arranged in a cluster. The VAX 3100 and 4200 computers at Brittany Ferries' 12 agencies will be connected to the central system using the group's private X.25 **network**, via Decnet.**

Pizzaland opens M-way services

UK - FIRST SERVICE STATION OUTLET UNVEILED BY PIZZALAND
Marketing Week (MW) 5 June 1992 p6

Pizzaland's first-ever service station outlet in the UK has been opened at the Aust service area outside Bristol. Waitress service will be available at this outlet, as research conducted with drivers found a desire to spend longer **time** at service stations. Pizzaland is aiming to open a number of other **restaurant** concepts, including its Bella Pasta fresh pizza chain. It is possible that Moevenpick (Switzerland) and McDonald's may choose to open fast food outlets on the motorway **network** once regulations stating that services must be 30 miles away from each other are relaxed.

Thai Imperial group plans 1,400-room hotel

THAILAND - 1,400-ROOM HOTEL TO BE OPENED BY IMPERIAL FAMILY
Caterer & Hotelkeeper (CH) 20 November 1991 p18

Imperial Family of Hotels will open the 1,400-bedroom Imperial Queen's Park hotel in Bangkok, Thailand, in August 1992, which will be the country's largest hotel. The hotel will have **capacity** for 12k occupants, and will have 13 function rooms, giving SE Asia's most extensive function and convention facilities. There will be 125 suites, a library, a leisure centre and 6 **restaurants**, and a **maximum** of 50 bedrooms will be designed so they can be changed into small offices. According to Akorn Hoontrakul, chairman of Imperial Family of Hotels, the new hotel forms part of a plan to develop the Imperial Family of Hotels' **network** of forty 3-5 star hotels in Thailand over the coming 5 years, by means of JVs and management contracts. In April 1991, the Imperial Family of Hotels went public, but 80% of stocks are still controlled by the family.

Communication et convivialite

FRANCE - USE OF INFORMATION TECHNOLOGY IN HOTEL SECTOR

Zero Un Informatique Hebdomadaire (ZH) 1 November 1991 p19

Language: French

Only between 10% and 20% of traditional **restaurants** and 1- and 2-star family hotels in France use computer systems, according to Alain-Philippe Feutre, president of SFH, the French hotel trade association. However, most hotels and hotel-restaurants rated at three stars or over are 70%-computerised, the SFH believes. Computer systems such as that used at Le mas du Langoustier hotel- **restaurant** at Porquerolles, France, can handle a variety of functions including payroll and the management of the bar, restaurant, **bookings**, stocks, orders and deliveries. Based on Gesthotel software from GHM, the system used by the hotel runs on a 4-station Novell **network**. The tools used in fast-food restaurants, which are generally computerised, are becoming increasingly user-friendly to reduce the **time** involved in training employees. Pizza Hut uses a Handy Ciel portable terminal from Microciel to take orders in the **restaurant**, where a server uses infrared transmission techniques to send orders to the tills and to printers in the kitchen, bar and cellar. Meanwhile the Meridien Etoile hotel is installing the Remanco Vision system distributed by Arms which uses terminals with tactile screens linked to a server. While Best Western, a hotel chain, is currently installing the Star II interhotel **reservation** system from Star System in France, more and more international hotel chains are connecting up with large **reservation** systems like Sabre or Amadeus which provide other services such as airline seat **reservations** and car hire.**

Value creation in mobile commerce: Findings from a consumer survey
Anckar, Bill; D'Incau, Davide
JITTA : Journal of Information Technology Theory & Application v4n1 PP:
43-64 2002
ISSN: 1532-4516 JRNL CODE: JTITA
WORD COUNT: 10891

...TEXT: routine bank services constitute the two top applications given the exceptionally high adoption rate of **online** banking in Finland, the popularity of **reservation** services (cinema/theatre tickets and **restaurant** tables) was somewhat surprising, as was the unexpectedly low popularity of commonly hypothesized killer applications such as **online** games, music, and news services. Many proposed m-commerce applications are likely to be highly...

...invasive. Interestingly, the results of this study indicated that the average consumer is reluctant to **accept** personalized shopping **offers** on his mobile device.

As regards our objective to identify the primary target groups for...
